Configure IE for SharePoint 2010

Thursday, November 24, 2011
1:20 AM

SharePoint 2010 uses built in Authentication with Active Directory. If you are joined to the campus domain (ad.umd.edu), you can experience a secure single sign-on experience.

**Please use the following for IE 7 or greater.**

1. Open **Microsoft Internet Explorer**.
2. Browse and logon to your SharePoint site.
3. In **Internet Explorer**, click on **Tools >> Internet Options**.
4. On the **Internet Options** screen, click the **Security** tab > Local intranet > Sites
5. Click **Advanced**
6. On the next screen, You will see the web address of your SharePoint site
   1. In the Add this website to the zone: textbox. Click the Add button.
   2. Click the Close button.

7. On the next screen, Click Ok.

8. In the Security level for this zone section of the Security tab, click the Custom level button.
9. Security Settings - **Local Intranet Zone** window will open.
10. Scroll down to the bottom of **Security Settings - Local Intranet Zone**.
11. Under **User Authentication** and under **Logon**, select **Automatic logon with current user name and password**.
12. Click **OK**.
13. On the last screen, Click **Ok**.
14. Close all **Internet Explorer** sessions.
15. Open **Internet Explorer** to start using automatic logons.

**If you are an OU Admin, you can create a GPO to accomplish the same thing. Please contact server-group@umd.edu to discuss best practices when implementing a GPO**

**Depending on your environment, I've seen where this can still cause problems. Please see the following link (http://support.microsoft.com/kb/303650) for more information.**
